# Lancaster West Residents Association and the Health Partners programme

**Lancaster West Residents Association is working in partnership with the NHS, Residents Associations and other community, voluntary and faith organisations to support communities in North Kensington in building a healthier future.**

The aim of the Health Partners Programme is to:

- strengthen the wellbeing of individuals, families and the community
- improve the understanding of basic health information and services so people can make good health decisions

- develop and deliver services that are culturally sensitive
- engage with the community to help share health messages.

“By coming together we can understand the community’s needs and working with local people, agencies and partners and combining resources, knowledge and skills, we should be able to develop our solutions and achieve our vision.”

Abbas Dadou, LWRA
