

# Agenda Item A4(i)

THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA  
GRENFELL RECOVERY SCRUTINY COMMITTEE – 28 NOVEMBER 2018  
REPORT ON MENTAL HEALTH BY  
WEST LONDON CLINICAL COMMISSIONING GROUP (CCG)

## 1. PURPOSE

- 1.1 This report is an update on the provision of mental health services for the residents of North Kensington following the Grenfell Tower fire.

## 2. MENTAL HEALTH SERVICES CURRENTLY IN PLACE

Mental health support is delivered through the **Grenfell Health and Wellbeing Service** (GHWS) which consists of Outreach, Child and Adolescent Mental Health Services (CAMHS) and adult provision and referral to GHWS is via the GP.

West London CCG (WL CCG) also commissioned a **Screen & Treat programme** that is designed to screen all residents affected by the fire and those with long-term health conditions. This programme is on-going and is conducted by GPs who offer longer appointments to allow for review of physical and mental health needs. Following screening, the GP can then refer the patient to either GHWS or third sector organisations.

### 2.1. CAMHS

The service has been operating from 5 schools in the immediate area surrounding the Grenfell Tower with a view to be operating within the further 7 schools in this vicinity by spring 2019. The services provides:

- Working in partnership to deliver emotional and mental health support services based in schools including working with Place2Be, MIND, West London Action for Children, and the Catholic Children's Society
- Working jointly with school nurses and dedicated CAMHS link workers to identify key themes and issues within each school
- Building strong partnerships with bereavement support services such as CRUSE and Winston's Wish, Child Bereavement UK to support an individual or family where appropriate
- Working with dedicated Education Psychologist who are trained in the areas of emotional well-being, bereavement, loss and critical incidents.
- Running a school screening programme within the most effected schools to screen children and young people for trauma. Where appropriate, a referral

is then made to the CAMHS Service for treatment or third sector support services

- There are also 2 young people's community practitioners who attend children's centres, assist with the school screening programme and attend local community events to support children and young people.

## **2.2. Adult Services**

The adult service works alongside local partners including GPs and the Outreach/CAMHS teams and secondary care provision to treat those affected by the Grenfell fire in suitable environments that enable patients to feel they can speak freely in a safe and confidential space. The service provides:

- Screening for the affected adult community at a rate at which it is possible to take people into treatment in a timely manner.
- Ensuring a comprehensive assessment is offered followed by treatment or signposting where mental health difficulties are identified.
- Offering treatment to those adults identified and referred by other healthcare partners i.e. GPs/Outreach Team/Single point of Access team. Those not identified by these routes will be proactively contacted as part of a comprehensive screening programme.
- Working in partnership and collaboratively with the many and diverse groups, volunteers and agencies working to support the community.

## **2.3. Outreach Services**

- The CNWL outreach team is a multi-disciplinary team of mental health professionals and support workers (some of whom come from the local community) who work within the North Kensington community to provide information and support to residents affected by the Grenfell fire. Their approach is flexible, pro-active and creative and is informed by continual dialogue and engagement with a wide range of community stakeholders.
- The outreach team also provide initial assessments for PTSD – often in community settings or in people's homes, and wherever else indicated. With patient consent we will refer people into the adults Grenfell service in CNWL for clinical assessment and treatment – for conditions such as PTSD, depression, anxiety, or other mental health issues.

## **2.4. Overnight Mental Health Support**

There has been overnight provision of mental health support since September 2017 for individuals who have been affected by the Grenfell Tower incident. The service was operating from Notting Hill Methodist Church until the end of September 2018. From 26 October 2018 CNWL have been providing a clinical telephone-based mental health service throughout the night with home visits for those who require enhanced support.

This change in provision is to provide a more personalised, targeted service for the 8 attendees who have used the service over the course of the last 12 months. Since the running cost of the service was £245,000 in last seven months, it was

appropriate to alter the service so that resources were used more efficiently and effectively.

Due to the low level of attendance, CNWL undertook a review of this service in October 2018. This involved the offer of meeting with individuals and an online survey. From the 8 individuals contacted, 6 completed the survey.

Of note the overnight service is available to all who require overnight support.

There are 3 helpline numbers available for North Kensington residents to access for support:

- 24 hour Single Point of Access (SPA) line - **0800 0234 650**
- Grenfell Health & Wellbeing Service (self-referral available) - **0208 637 6279**
- The Overnight Service - **0208 962 4393**

**3. ACTIVITY DATA ON MENTAL HEALTH SERVICES** (From June 2017 to end of September 2018):

- (i) 9,996 contacts with over 100 complex cases being case currently managed by them.
- (ii) Outreach have attempted to contact 16,316 people in total, 6,320 were not ready to respond.
- (iii) Screening for trauma has been provided for 4,284 people (3,789 adults and 495 children). 1,504 individuals entering treatment (1,229 adults and 275 children)
- (iv) 586 completing treatment (276 adults, 113 outreach cases and 197 children)
- (v) 1,130 declined treatment (948 adults and 182 children)
- (vi) 699 children and young people have been referred into CAMHS services to date. Treatment has commenced for 275 children. 197 children have completed their treatment. 182 children have declined treatment.

**4. INDEPENDENT SPECIALIST PEER REVIEW OF CURRENT MENTAL HEALTH PROVISION**

In October 2018, the CCG commissioned a specialist peer review of the mental health services currently being delivered. This review team consists of a number of international psychological disorder experts who have a background in disaster management and the impact of those affected.

The aim of the specialist review is to consider practice to date in regard of diagnosis of PTSD prevalence within the affected community and efficacy of diagnostic screen and treat tool utilised.

The aim is to arrive at an understanding of the nature of the types of psychological impact in this specific incident with particular consideration of equalities/cultural competency. The outcome will also be used to support future commissioning decisions.

## **5. CULTURAL COMPETENCY FRAMEWORK**

WL CCG has received significant feedback from the community regarding the need for culturally appropriate delivery of mental health and wellbeing provision. To this end, the CCG is developing a Cultural Competency Framework which is a set of key principles of how we ensure NHS services meet cultural competency criteria. Examples of this are staff attendance at cultural competency training, and ensuring staff recruited to roles have extensive experience of working with patients with a diverse background.

The framework will support the development and delivery of health services within a culturally responsive environment and ensure not only ease of access to services but to their relevance to the individual and thus leading to better health outcomes. The development and application of such a framework not only enables us to fulfil our duties under the Equalities Act but demonstrates an evidence led approach to asset based healthcare.

The Culture Competency Panel has agreed the following objectives:

- (i) ensuring that physical and mental wellbeing services commissioned are relevant to the needs of diverse communities.
- (ii) develop a set of innovative criteria to be used in commissioning processes and indicators against which the service can be monitored.
- (iii) to work with the Equalities and Human Rights Commission who have agreed to work closely and endorse the final framework
- (iv) Critically to test the effectiveness of the Framework with the local communities

## **6. COMMUNITY ENGAGEMENT**

Engagement regarding physical and mental health and wellbeing has focused on the need to ensure that commissioned services meet the needs of the different communities and is delivered in a culturally appropriate environment. The CCG have been working in partnership with Al'Manaar, Midaye, Ethiopian Women's Empowerment Group and a range of other groups to begin to develop culturally appropriate models of therapy for people diagnosed with physical and mental health needs such as anxiety, depression and PTSD.

This is based on the evidence that communities with different cultural backgrounds have different assumptions about disease, illness and healing. Scientifically grounded evidence based treatments do not always work for these populations. This process has led to the identification of the need to develop a Cultural Competence Framework against which service specifications can be developed and subsequently measured for their impact and relevance.

Examples of community engagement:

- working with people from across North Kensington to design and co-deliver the 'Mindful Youth Event' on 22 September 2018
- undertaking in-depth community conversations with individuals/families and third sector groups to shape and influence future provision – started in October 2018 and finish in December 2018

- design and implemented Community Assets Mapping programme to identify what assets exist within communities – started in April 2018 and is on-going

## **7. LONG-TERM HEALTH PLANNING**

The CCG is working with key stakeholders and the North Kensington community/residents to better understand requirements to inform development of a health recovery plan that will meet the long-term health needs of this community. We are committed to designing future delivery in partnership with the community as it recognises the mutual support communities provided and continue to provide locally.

The aim is to develop a community development model that is able to change and respond to local need; to build community resilience via self-care programmes that support individuals to manage and maintain healthy lifestyles as well access to physical and mental health care when required. To this end the CCG and NHS partners are part way through a three month community engagement programme to design the future health recovery plan for North Kensington, this will conclude in December 2018.

The CCG is also working in partnership with other health professionals, RBKC and the Third Sector and drawing on local knowledge from primary, community and mental health teams to identify key areas of support and resources for recovery across health and social care. The multi-disciplinary local teams are able to make connections and manage referrals to ease transition from one service to another, across inpatient and community care, health and social care, specialist and community services, with appropriate guidance and support.

All other existing services will continue but evolve in their style as community need changes.

The CCG has undertaken a series of community engagement events/meetings/community conversations/asset mapping etc. and to date the key themes that have emerged are:

1. Developing mental health support services for our diverse communities which addresses trauma adopting a non-medicalised approach.
2. Building a robust communications platform through social media to allow young people, specifically young men, to create a continuous dialogue around their health and wellbeing needs.
3. Working with our community and voluntary sector organisations to continue to build capacity and capability and develop a robust infrastructure that includes quality assurance processes that they can continue to meet the needs of local communities.
4. Prioritising vulnerable groups i.e. parents with under 5's and BME men under 25 years of age.
5. Promoting self-care as a regulatory function which is self-initiated and gives residents confidence and greater control of their own health and encourages healthy behaviours.
6. Developing a more targeted approach of the mental health outreach team.

7. Proactively developing an approach to engage members of the community who are reluctant to access statutory services.
8. Delivering a systemic family-focused approach to recovery
9. Developing a dedicated service for survivors and the bereaved designed by those who require the service.
10. Enabling young people to feel heard as an equal voice to their adult counterparts.

These themes will inform the development of the health recovery strategy for the community. In addition we will use a population health approach to frame future commissioning intentions which will enable us to secure improved outcomes for the defined local population. The key principles of this approach are:

- working with the wider determinants of health; reducing health inequalities, embedding radical prevention interventions and continued partnerships, working with and empowering communities.
- The integration of physical and mental health is underpinned by CCG's integrated care strategy that seeks to deliver the ambitions of the 10 year NHS strategy

#### **7.1. For the survivors and bereaved**

A systematic programme of health checks will commence in November, building on the enhanced primary care service to date. This will include:

- on-going mental health screening that will include screening for anxiety disorders.
- on-going treatment and systematic treatment and signposting for physical and mental health
- for children we will offer an integrated care approach which will actively monitor children as a combined clinical workforce involving paediatrician, GPs, CAHMS, school nurses and health visitors - through a multi-disciplinary approach
- Long-term respiratory monitoring under specialist care including asthma and smoking cessation programmes (in accordance with further scientific evidence)
- social prescribing for wider health and wellbeing support
- Additional monitoring for long term conditions e.g. diabetes and weight gain management

Design of this provision is underway with Grenfell United and individual survivors and will form part of the dedicated service for survivors and bereaved.

#### **7.2. For the wider community**

The totality of the NHS offer for the wider community will include:

- Health events where North Kensington residents can receive expert advice from Respiratory, Paediatric & Neurological Consultants and local GPs. Alternative therapies will also be on offer at these events.
- Enhanced systematic physical health checks delivered by Healthy Hearts and GP practices.
- The continuation of on-going provision of the fast track respiratory provision for both adults and children.
- On-going monitoring and treatment for mental health trauma.
- Active and systematic promotion of health and wellbeing services to all residents of North Kensington – creating a dialogue with those who are not currently accessing health service.
- Case management for individuals and families with a focus on social prescribing to support wellbeing and recovery.
- Additional monitoring for long term conditions e.g. diabetes and weight gain management.

## **8. THE NEXT PHASE**

In October 2018, NHS England confirmed funding for a further 5 years, for delivery of health and wellbeing services for North Kensington residents affected by the fire.

The CCG is collaboratively across the healthcare system, completing the business case for release of a tranche of the allocated funds for the next 12 months (up to maximum of £10m).

Our ambition for the next 12 months is to move towards integrated physical and mental health, delivered by a number of healthcare providers, in a seamless way. This will benefit the North Kensington community by reducing the number of healthcare appointments with differing professionals, with a single point of contact for the totality of their healthcare needs and those of their family members.

### **8.1. Short term outcomes**

- The CCG will be completing local engagement and will consolidate the feedback received.
- This will inform the first draft of the Health Recovery Plan due in January 2019. This will build on existing provision with an ambition to further develop social prescribing and self-care.
- To work alongside RBKC to align healthcare provision for survivors and the bereaved with the Dedicated Service as described in the RBKC Scrutiny paper.

## THE ROYAL BOROUGH OF KENSINGTON AND CHELSEA

### GRENFELL RECOVERY SCRUTINY COMMITTEE – 27 NOVEMBER 2018

#### RBKC GRENFELL RESPONSE – MENTAL HEALTH AND EMOTIONAL WELLBEING SUPPORT

#### REPORT OF THE DIRECTOR OF COMMUNITIES & PEOPLE, GRENFELL TEAM

This report outlines mental health and emotional wellbeing grants and contracts which made up the Council's support offer for residents of North Kensington in the wake of the Grenfell Fire.

#### **1. Introduction**

- 1.1. This report outlines the past and current mental health and emotional support offer for residents of North Kensington. The framework of support was commissioned through the Council's Grenfell Health and Wellbeing Team which sits within the Grenfell Directorate of the Council. This report provides a summary of all of the grants and contracts which were allocated to support mental and emotional health as part of the emergency response in the wake of the Grenfell Fire. The paper marks the Council's intention to transition all current arrangements into established commissioning arrangements within the Council in order to ensure the support needs of Grenfell affected children, families and adults can continue to be met in the long-term.

#### **2. The Emergency Response**

- 2.1. In the immediate aftermath of the Grenfell Tower tragedy on 14 June 2017, there was significant need across a diverse population in North Kensington. Local community organisations and volunteers had quickly mobilised a variety of support but there was an urgent need for funding to expand the response further.
- 2.2. In order to support the relief efforts happening on the ground the Council set-up an Emergency Funding Programme. This was a cross-departmental emergency grants programme established to help provide immediate financial support to organisations involved in the Grenfell Tower response. An interim emergency response team was formed and made up of staff from Community Engagement, Children's Services, Adult Social Care, Public Health and Environment, Leisure and Residents Service.
- 2.3. Officers sought and were given cabinet level approval to bypass the 'business as usual' protocol, step outside of their normal ways of working and respond quickly to requests from community groups. Records show that the first grant was released 9 days after the tragedy on 23 June 2017.

2.4. To ensure finances were not a barrier in the response to the disaster, it was agreed that a timely and non-bureaucratic in-house process needed to be set up that could support the efforts and work of the local voluntary community sector. All proposals were quality assured against the following criteria:

- Local grass roots organisation with experience operating in North Kensington
- Experience delivering the type of support they are seeking funds for
- Endorsed by the relevant senior manager who has expertise in the particular area

2.5. By September 2017 approximately £1.7m of grants were distributed to community organisations. This funding was allocated to meet the needs in the following areas:

- (i) **Humanitarian relief work** funding used to support some of the many community organisations and groups that responded to the tragedy on the night of 14th June 2017 by providing and coordinating volunteers, food, water, shelter and counselling. Within four weeks of setting up the emergency funding programme the Council provided £538,674 directly to community organisations working on the ground. An additional £186,606 was spent on operational and professional costs including translation services, vehicle hire and other professional fees.
- (ii) Increased **Summer holiday provision** for children, young people and families. Funding was used to offer additional services in North Kensington. This was vital in providing positive activities for children and young people including access to therapeutic support. Parents and adult family members also benefited by having respite time to allow them to access additional support. £341,643 was spent on increased childcare and play centre provision in North Kensington during 2017 school summer holidays.
- (iii) **Support for Schools** during the 2017-18 academic year. The offer focused on those schools most directly affected. Funding was used to procure specialist providers offering counselling/emotional support including art and other play therapies to ensure pupils were able to access appropriate levels of support. This support was fully integrated with Educational Psychology support and the offer from Child and Adolescent Mental Health services (CAMHS). The majority of these arrangements were made by extending arrangements with providers with existing links in schools based primarily in the north of the borough. £681,565 was allocated during the 2017-18 academic year to strengthen school based emotional support for pupils directly and indirectly affected by the Grenfell Tower Tragedy.
- (iv) Please refer to Appendix 1 for the list of funded organisations.

### 3. **Dedicated Support for Recovery**

3.1. In September 2017, the Chief Executive's paper, 'Fit for New Purposes' recommended that a Grenfell Directorate be established within the Council's structure.

3.2. A dedicated team was established in November 2017 to work across the Council, with partner organisations, and with the community to help address immediate

health and wellbeing needs, and to contribute to the design of a longer-term recovery plan for North Kensington.

- 3.3. As the wider response moved from an emergency phase to one of recovery, most existing grant arrangements were transferred to contractual ones ensuring that there was a greater emphasis on quality assurance and monitoring and evaluation.

#### **4. The Health and Wellbeing Offer 2018-19**

- 4.1. The total spend to meet the mental health and emotional wellbeing needs of those affected in the 2017-18 financial year was £4,418,620. There is an additional £1,588,497 committed in 2018-19. This represents an overall spend of £6,007,117 to date.
- 4.2. Currently, there are nine contractual arrangements and three grants that remain. Please refer to Appendix 1 which provides details of all mental health and wellbeing services for adults and children that have been funded to date.
- 4.3. The current arrangements reflect priority areas that have been identified as **foundations for recovery in the Public Health report 'A Journey of Recovery'**<sup>i</sup>. Pages 101-108 of that document outline those foundations and the following foundations link closely to current funding arrangements.
- 4.4. **Foundation 3 ensuring services are inclusive and culturally appropriate.** As part of the Grenfell response officers have worked closely with Al-Manaar, Midaye and MCWG<sup>ii</sup> and health specialists from CNWL to create a framework of flexible culturally appropriate emotional wellbeing support for children and adults called Together for Grenfell. The objective of this framework are:
- To introduce the concept of mental health provision in a- non-threatening and non-judgmental way, offering a culturally sensitive approach.
  - To create joint working and pathways into NHS mental health services from within local culturally appropriate services
  - To introduce emotional support, psychoeducation and self-care into open access groups where young people and adults are coming together.
  - To develop a model of culturally appropriate support that in time could be replicated across other services and organisations in the borough
- 4.5. **Foundation 4 providing joined up support to bereaved and survivors.** Currently there are two bereavement organisations delivering specialist bereavement support to children and families.
- 4.6. **Foundation 5 investing in Children, young people and families.** The enhanced wellbeing offer in Schools was reviewed and has been extended for the full academic year 2018-19. Additional support is also in place for family support and the delivery of evidenced based parenting and grief recovery programmes.
- 4.7. **Foundation 9 providing support for community capacity and investment in spaces where people come together.** Funding has been provided to new organisations that have developed since the Grenfell tragedy. These

organisations are using spaces across North Kensington to provide creative and flexible wellbeing support to children, adults and families.

## **5. The Future Health and Wellbeing Offer**

- 5.1. For 2019-20 it has been estimated that circa £700,000 will be required to ensure there is an enhanced offer to the wider community. This is in addition to the monies for the dedicated service as outlined in the Councils Recovery Commitments<sup>iii</sup>.
- 5.2. All remaining contracts and grants will be transitioned safely to the relevant commissioning team across Adults Services, Children's Services, Public Health and Community Engagement, who will undertake to review services to ensure that they are outcome based and avoid duplication. The Council's Public Health Team will have a key role in determining future commissioning priorities following the Stronger Communities Consultation and in line with learning from the Public Health report 'A Journey of Recovery'.

26	Goldsmiths College (LCAT)	Art Therapy provision for young people at the Henry Dickens Centre and Al Manaar Centre.	July 2017 - September 2017
27	Goldsmiths College (LCAT)	Art Therapy provision for young people at the Henry Dickens Centre and Al Manaar Centre.	July 2017 - September 2017
28	Grief Encounter	Trauma and grief counselling support for children and families.	July 2017 - September 2017
29	H&F Mind	Counselling and emotional wellbeing support.	October 2017 - August 2018
30	Hestia	Outreach service, recovery café, resilience groups and volunteer counselling support.	September 2017 - August 2018
31	Hestia	Overnight counselling provision in hotels.	September 2017 - September 2018
32	Hestia	Outreach service, recovery café, resilience groups and volunteer counselling support.	September 2018 - February 2019
33	Hodan Somali community	Counselling and emotional wellbeing support.	July 2017 - September 2017
34	Hope Care Agency	Counselling, practical support and interpretation.	July 2017 - September 2017
35	Hornimans Adventure Playground	Expansion of the summer play programme.	July 2017 - September 2017

36	Jamie's Farm	Family week in partnership with Family's First for young people.	July 2017 - September 2017
37	Journey of Hope	Interventions and retreats to build resilience, encouraging people affected by suicide to create a peer-support network.	August 2017 - May 2018
38	Kensington Primary Academy West London Free School Primaries	Additional support for pupil affected by the tragedy	November 2017 - July 2018
39	K&C Citizens Advice Bureau	Resources to handle additional casework	July 2017 2018 - September 2018
40	K&C Citizens Advice Bureau	Resources to handle additional casework	October 2018 - March 2019
41	Kids on the Green	Creative arts, play and wellbeing provision for children and families	February 2018 to April 2018
42	Latimer Community Arts Therapy	Community and schools based art therapy	February 2018 - August 2018
43	Latimer Community Arts Therapy	Emotional support in schools, 2018/19 academic school year	September 2018 - July 2019
44	Latimer Community Arts Therapy / Henry Dickens Centre	Art Therapy in the community and at the Henry Dickens Centre	October 2018 - December 2018
45	Making Communities Work and Grow	Advice and support to young people and one off events.	Summer 2017
46	Making Communities Work & Grow (Together for Grenfell)	Youth Peer Mentoring support outreach worker position.	April 2018 - March 2019
47	Making Communities Work & Grow	Youth services and supplementary school	December 2017 - November 2018
48	Masbro Centre - Urban Development Partnership	Provision of a 'calm space' for children and families which provides activities and therapeutic support.	July 2017 - January 2018
49	Maxilla Nursery School & Golborne Children's Centre	Support for children to access the holiday club and mosaic family workshops.	July 2017 - August 2017
50	Meanwhile Gardens	Funding to extend opening hours providing a safe area from 2-6pm on the weekdays.	July 2017 - August 2017
51	Midaye Somali Development Network	Community engagement to support survivors.	August 2017 - March 2018
52	Midaye Somali Development Network	Practical and emotional support to individuals and families.	July 2017 - December 2017
53	Midaye Somali Development Network (Together for Grenfell)	Culturally appropriate activities and interventions provided in Arabic and Somali.	April 2018 - March 2019
54	My Shepherd	One to one counselling sessions for people that are directly affected survivors	August 2017 - January 2018
55	Nasima Khanom Counselling Psychotherapy Consultancy	Specialist Culturally Sensitive & Faith Based Therapeutic Service at Al-Manaar centre.	July 2017 - August 2017
56	Nasima Khanom Counselling Psychotherapy Consultancy	Specialist Culturally Sensitive & Faith Based Therapeutic Service at Al-Manaar centre.	September 2017 - December 2017
57	Nasima Khanom Counselling Psychotherapy Consultancy	Specialist Culturally Sensitive & Faith Based Therapeutic Service at Al-Manaar centre.	January 2018 - March 2018
58	National Zakat Foundation (Grenfell Muslim Response Unit)	Support via the Grenfell Muslim Response Unit	February 2018 - June 2018
59	Octavia Foundation	Befrienders for victims aged 18 to 50, including those with specific language needs.	September 2017 - June 2018
60	Open Age	Community Outreach for people over 50.	July 2017 - June 2018
61	Pamodzi	Counselling service in a safe and confidential environment.	September 2017 - March 2018
62	Place 2 B	Emotional support in schools, 2017/18 academic school year	September 2017 - August 2018
