

Services for survivors and bereaved

January – March 2025

• The **NHS Dedicated Service (DS)** run by Central and North West London NHS Foundation Trust (CNWL) is here to help Grenfell survivors and bereaved families find and access a range of health services for both physical and emotional wellbeing. The NHS Dedicated Service:

- Brings together physical and mental health services
- Helps clients connect to the right NHS and community support
- Provides coordinated multiagency help for complex cases

The NHS commissioned a number of **specialist services** to diagnose and treat any health conditions which arose from smoke, particulate and poison inhalation.

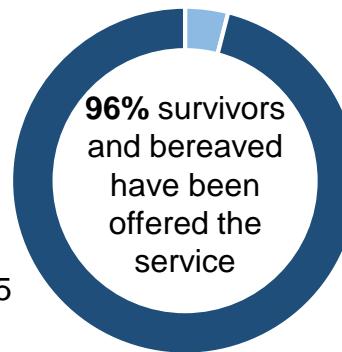

- **Paediatric Long Term Monitoring Service** – Children and Young People section.
- **Adult Respiratory Long Term Monitoring Service**

This service is designed for Grenfell Tower survivors who had prolonged smoke exposure. In addition to a detailed review of the individual's lung health, the service is able to link into other subspecialty respiratory services.

Feedback

Patient Engagement Questionnaire: There were 0 questionnaires collected during this quarter.

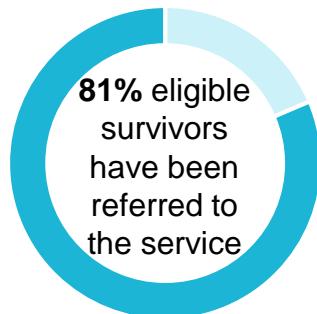

This is a reduction when compared with the eight (8) collected in April to June and three (3) in July to September 2024

I don't know how to put it into words, but you've lifted me from the ground to the sky. You are truly amazing, and I can't thank you enough.
