

Services for survivors and bereaved

July – Sept 2025

•The **NHS Dedicated Service (DS)** run by Central and North West London NHS Foundation Trust (CNWL) is here to help Grenfell survivors and bereaved families find and access a range of health services for both physical and emotional wellbeing. The NHS Dedicated Service:

- Brings together physical and mental health services
- Helps clients connect to the right NHS and community support
- Provides coordinated multiagency help for complex cases

The NHS commissioned a number of **specialist services** to diagnose and treat any health conditions which arose from smoke, particulate and poison inhalation.

- **Paediatric Long Term Monitoring Service** – Children and Young People section.
- **Adult Respiratory Long Term Monitoring Service**

This service is designed for Grenfell Tower survivors who had prolonged smoke exposure. In addition to a detailed review of the individual’s lung health, the service is able to link into other subspecialty respiratory services.

NHS Dedicated Service (DS)

161 Survivors
(including 40 Children)

129 Bereaved
(including 40 Children)

active with the Dedicated Service in Sept 2025
A very slight increase compared to June 2025.
